Courses Through A Life Worth Living

A Life Worth Living (ALWL) offers courses designed to help individuals and businesses enhance their accessibility and inclusivity. Our comprehensive training programs cover critical areas such as digital accessibility, inclusive design, assistive technology, and compliance with accessibility standards. Each course is tailored to equip businesses with the knowledge and tools to create accessible digital experiences and inclusive environments. By partnering with ALWL, organizations can ensure they meet legal requirements and embrace a culture of accessibility, fostering a more inclusive community.

Business Accessibility Toolkit (BAT)

The Business Accessibility Toolkit (BAT) program is broken into four distinct courses, each focused on a specific standard of the Accessibility for Ontarians with Disabilities Act (AODA). They are:

- BAT – General Requirements
- BAT – Customer Service
- BAT – Information and Communications
- BAT – Employment

Accessible Digital Communication (ADC)

The Accessible Digital Communication Course is an essential starting point for mastering the information and communication standard. This series introduces a new programming paradigm and design principles to enhance accessibility and user experience, opening new doors for your business.

- **Part 1:** Teaches best practices to create digitally accessible workplaces for employees and customers.

- **Part 2:** Learn a new programming paradigm featuring design principles to expand marketing doors.

- **Part 3:** Project leaders must understand how to integrate accessibility into the project life cycle and ensure quality control.web accessibility for technical teams and addresses key business decisions at the organizational level.

Practical Digital Accessibility for Technical Teams

The Practical Digital Accessibility for Technical Teams course discusses making digital products accessible to everyone, regardless of ability. Creating an inclusive experience for all users is essential. This course covers the basics of web accessibility for technical teams and addresses key business decisions at the organizational level.

Audio Description – The Visual Made Verbal

The Audio Description – The Visual Made Verbal course aims to train students as audio describers with potential for the development and delivery of description scripts for professional, student, or community arts presentations.
